Hi, we are Ivana and Alex, the owners of LinkDominators.com and HighPRLinkMasters.com. We`ve been doing business online for the past 4 years, and for the last couple of years we are doing SEO for a living. We are providing high quality SEO services and backlink services for countless numbers of clients.

Now, as we have tried many different strategies to achieve high search engine rankings ourselves, we are ready to share some of the best working techniques with YOU.

First of all, we would like to congratulate you on getting this book. This is an IMPORTANT document, and if taken seriously, these strategies will change the way you do business. Every word is here for a reason.

In this book, we are sharing our most successful strategies to get the webpages to the top of the search engines. These strategies not only work on our own sites, but they do really well for our customers too, this is why we are so confident about them.

As you might already know, there are things that need to be done once, when setting up the page to rank, and then there are things that need to be worked on continuously, on a weekly basis, to get the sites ranking well. We`ll speak about both of these in this book.

In this book, we teach the strategies first, and then go through the detailed plan on how to achieve high search engine rankings for your chosen keywords.

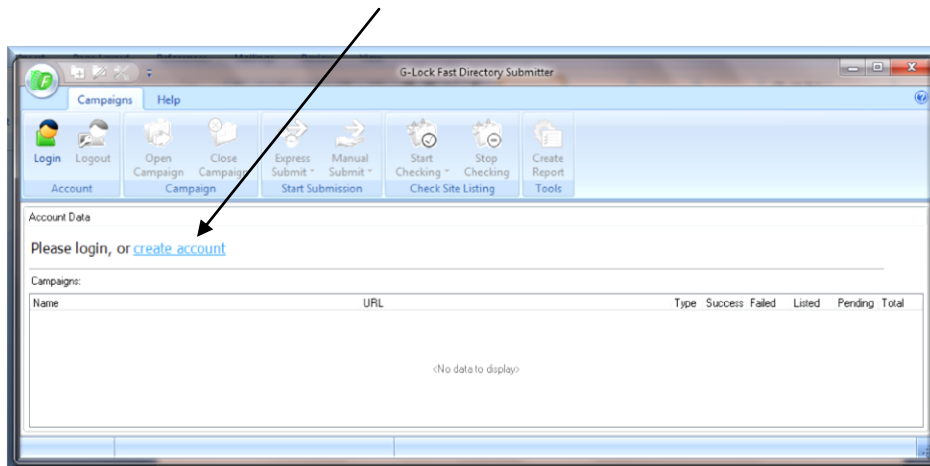

So get yourself a cup of coffee, and let`s begin!

#1: Strategy to get up to 150 backlinks in less than 30 minutes, by using a free software

Most people are not aware of [Fast Directory Submitter](#). It is a free software that is semi automated, and helps you get a bunch of backlinks without too much work.

Here is how it works.

1. First, got to www.yahoo.co.uk and create a new email address (it does not have to have your real name)
2. Go to create account, you will get a new table opened

Before you create a user account, please, read these quick tips:

1. Do not create a separate user account for each website. It is better to have one master account for all your websites.
2. Do not use free e-mail addresses from yahoo.com, usa.net, hotmail.com, gmail.com, mac.com etc. to create an account. If you would like to upgrade your submission campaign to the Gold type later, our payment processor will not accept orders from free e-mail addresses.
3. You can use this email address and password to login to Members Area on www.fastdirectorysubmitter.com.

First Name: Otto Last Name: Acosta
Email: otto4acosta@yahoo.co.uk Confirm Email: otto4acosta@yahoo.co.uk
Password: ***** Confirmation: *****

Keep me informed via email about product updates, upgrades, special offers.

We won't share your details with any third parties. If you do not wish to be contacted via email, please uncheck the box.

Create Close

3. Fill in the details
4. Click on “create” (it will give you success), and you will be taken to a new window, for adding a campaign.
5. Fill in the details:

Campaign Name: LinkDominators

Post Submission Data

URL: http://linkdominators.com/

Reciprocal URL:

First Name: Otto **Last Name:** Acosta

Email: otto4acosta@yahoo.co.uk

It is better to use an e-mail address from the same domain you submit to directories. This will increase the number of site approvals considerably.

Username: otto4acosta@yahoo.co.uk **Password:** *****

Keywords: seo, internet marketing

Category keywords: seo, interent marketing

Site Title/Description [3]

Title: Link Building Service Providers description: If you have been around Internet marketing for some time, you know that free traffic is awesome, but you also know that it takes forever to rank your URLs high in search engines.	Add
Title: Link Building Service description: If you have been around Internet marketing for some time, you know that free traffic is awesome, but you also know that it takes forever to rank your URLs high in search engines.	Edit
	Delete

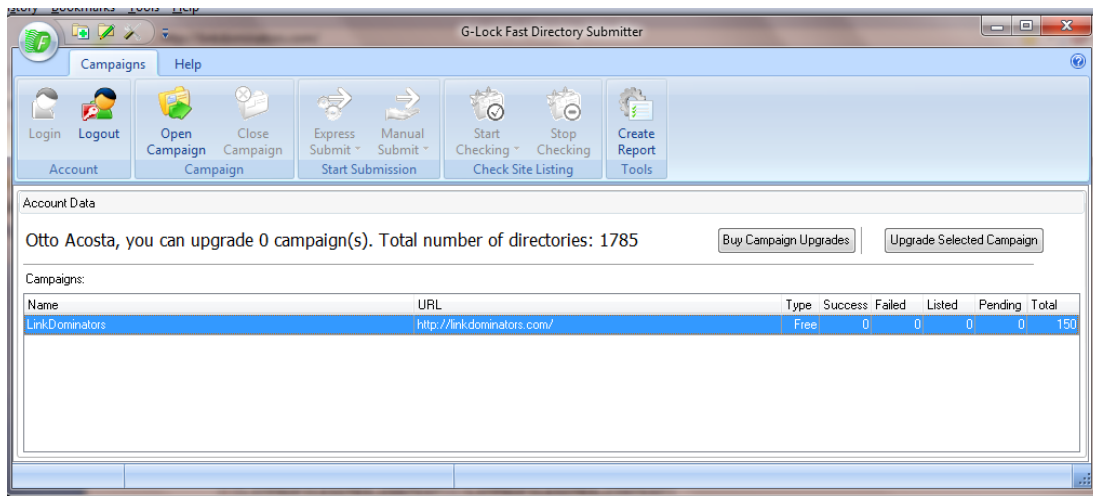

Bold fields are required. OK Cancel Help

Few things you should be aware of:

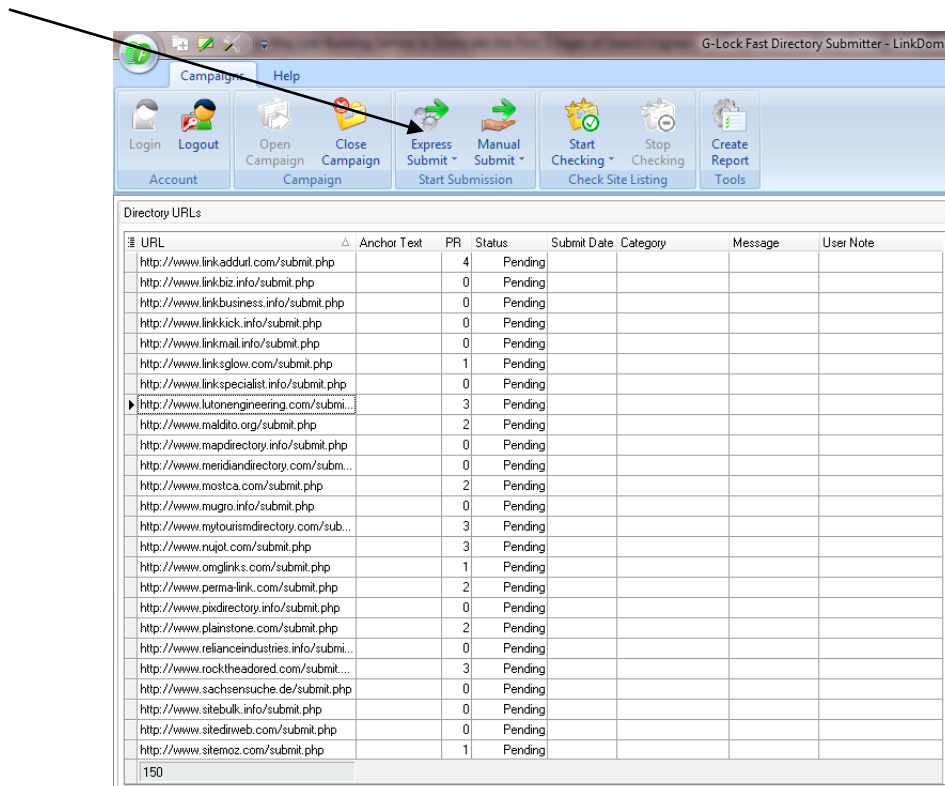

- Program will only allow 1 project (URL) per login!
- The URL you enter cannot be changed for some reason
- For Keywords and Category, we've been using the same category keywords because it tends to get strange results if you narrow it down too much.
- Always enter 3 different titles and descriptions because it is better for you

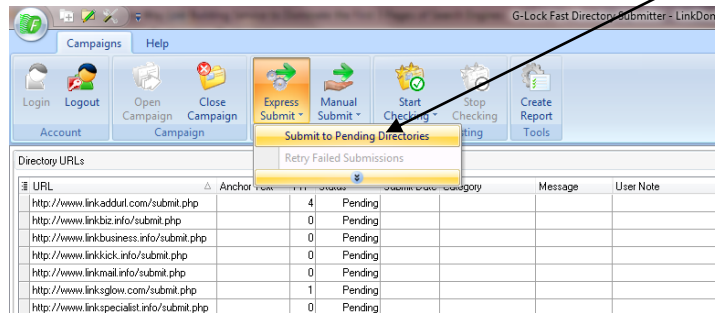

- Always have your main keyword phrase you are trying to rank for, in the title
- Once completed, you might have to log in again, at least that is what happens to us sometimes.

When you are done, you will see the screen below. Open the campaign

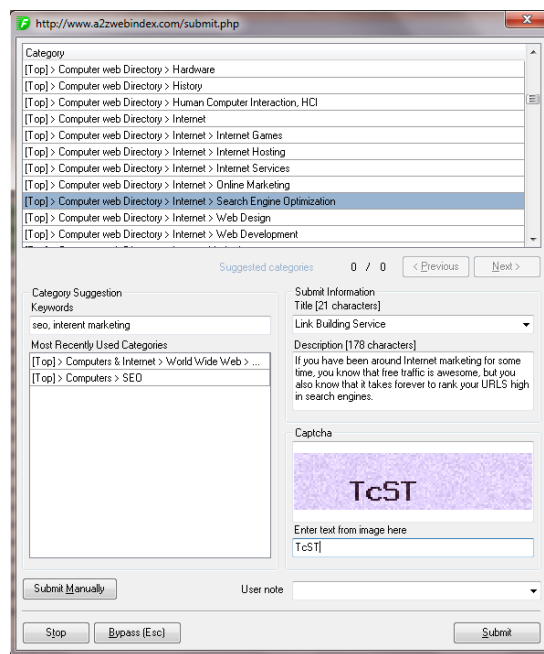

Go to "express submit" and start submitting to pending directories.

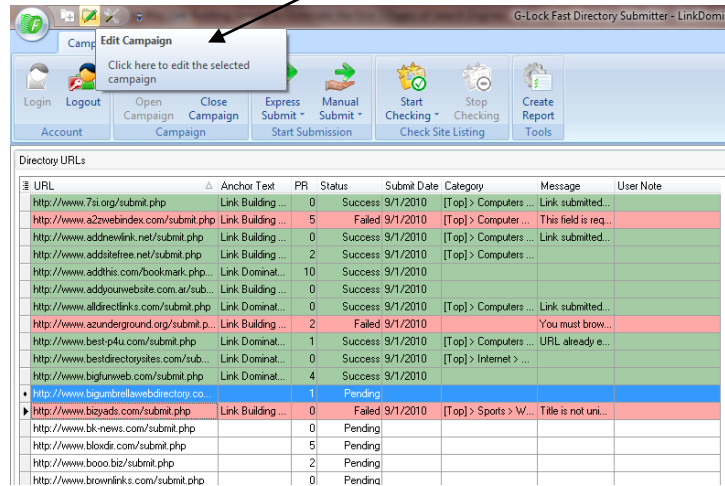

You will see the screen as the one below:

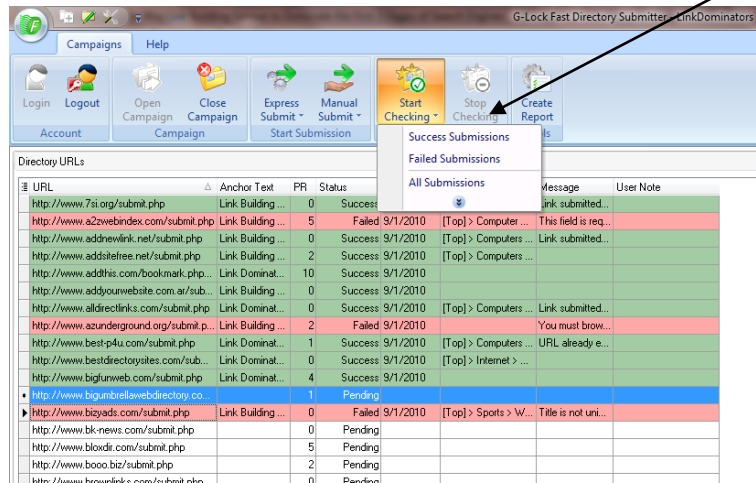

Be very careful with categories. Sometimes it really comes up with strange things such as work, society, so make sure the category is selected right, enter the captcha, and that is it.

Few more things to mention.

You can edit campaigns by clicking that little button at the top.

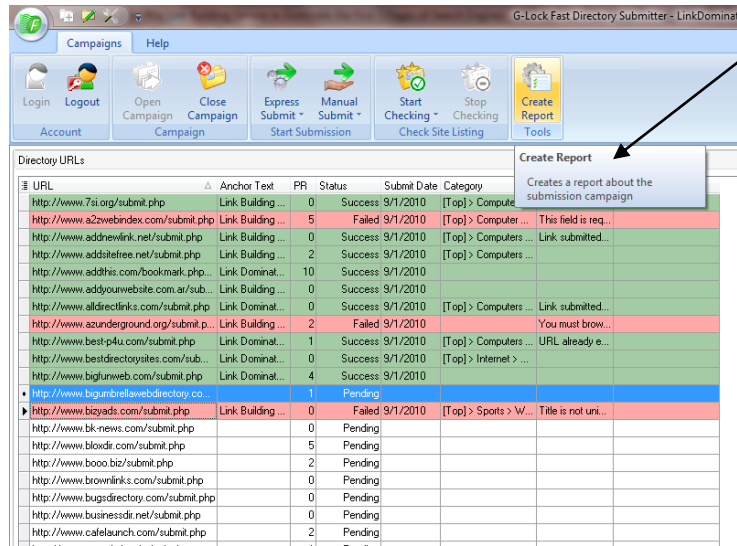

Once you are done, you can start checking the links.

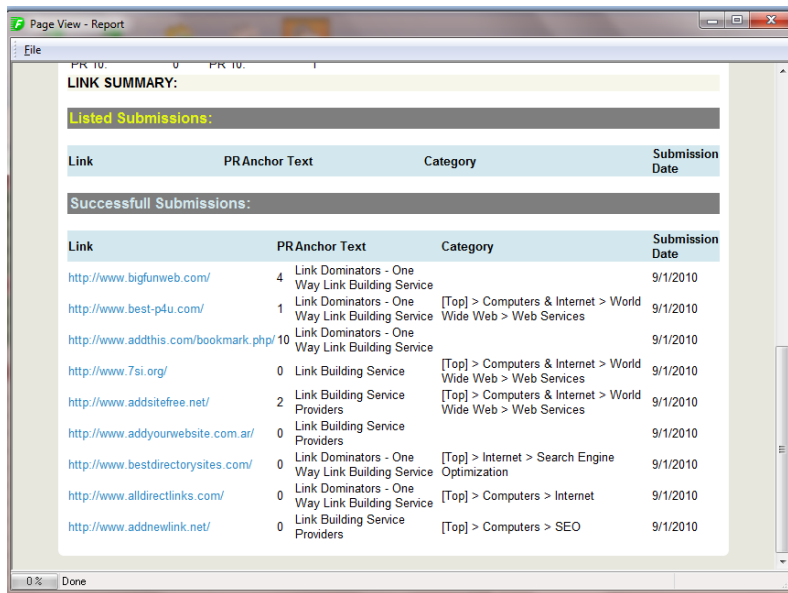

Keep in mind, with directories it takes time for them to be approved. So you can check in a month or so to find out that over 50 or 100 were submitted.

At the end, just click on "create report"

And you will get a report such as this one below:

#2: What about the Free Traffic System?

You know, most people are not aware of what the [free traffic system](#) can do for their sites. If you spend just 1 hour (and it can actually be done in 10 min.), you can get 60 links to your pages, from a variety of different domains, and all within your category!

Here is how it works.

It is a system that will help you with submitting unlimited versions of spinned articles into their network of blogs. This will be real articles, not blog comments.

So here is what you need to do:

Go to the free registration, and sign up for the account. Once you login, you will be taken to the page below. Make sure you do watch the intro videos!

Traffic in Any Niche

UPGRADE TO PRO NEW ARTICLE ADD BLOG MY BLOGS STATS AFFILIATE PROGRAM PROFILE HELP WP THEMES LOGOUT

Currently you are using **FREE membership** of Free Traffic System. To learn about the advantages of becoming a PRO member - [visit this page](#).

»New Article

Are you a fresh user? [Watch this intro video](#) - learn how to get traffic and make money with Free Traffic System.

How to prepare and submit article into the system - [video tutorial](#)

How to spin articles - [watch this video](#) - or [use this tool](#) to automate the job.

Keywords %KEYWORD1%: [Need keyword research help?](#) Links %LINK1%:

Keywords %KEYWORD2%: [Need keyword research help?](#) Links %LINK2%:

Want one more URL in each article? Become PRO! Read [more about PRO membership here](#).

Article Title (Click Check to preview article title to make sure it looks readable):

So not to explain what they already say in the into videos, but when you do submit your articles, it will give you a report such as this one:

Show records 30 Show My Posts Search by title

Pages 1 2 3 4 5 6 7 8 9 10 »

Blog	BlogCategory	Title	Date	Status
All Health Blog - All related Health Information (no sex/penis /sperm related please)	Nursing	Breast Feeding Vs. Formula Your Argumant	25.02.2010 13:03:16	No data received from server.

Advice About Everything	New Baby	Nursing VS. Baby Formula Your Argument	23.02.2010 19:04:06	Posted

Now, not sure if you caught that we said you can do this in 10 min, but basically we managed to cut that time by using [the best spinner](#). Remember it takes about an hour if you do it manually. So 10 min. tops with all the article spinning process. And of course you can use the PLR articles for that as well, here`s a good source of [free PLR articles](#).

Moving on!

#3: Press Release submissions can give you THOUSANDS of backlinks on autopilot!

Most people ignore submitting press releases. And to be honest, we did too 😊 but, I've got to say, that has been one of our biggest mistakes so far, because if you can spend 2 hours on this, you can get thousands of backlinks pointing to your pages. And don't think press releases are expensive, many good PR sites do not cost a cent!

Here is how it works:

First, you need to write an article of 250 words at least. Decent article, that sounds like “news” or “announcement”.

Optimize that article for the keywords you are targeting on your site. So if you are going to backlink a keyword “outsource link building”, you want to have that same keyword in the title, in the first paragraph, throughout the text and in the last paragraph. Of course, in the first paragraph of the text, link it with a link back to the site, just like in the example below:

The screenshot shows a website header with the title "information-online" and the tagline "the first choice for business news and press releases". The main article title is "Search Engine Rankings – Now You Can Outsource Link Building to Other People!". The article is by alexwilliams73, posted on February 28th, 2010. The tags include "desired search engine rankings", "online marketers", "online world", "particular web page", "search engine", "search engine gives", "search engine rankings", "search engines", "SEO", and "seo services". The article text starts with "There is only one thing you need in order get your desired search engine rankings, and that is getting one way links, and the problem is that one way linking take time as often one URL will require at least 100 links before it is noticeable on the first 10 pages of search engines. That time it takes those links is often wasted by many website owners and why anyone would want to waste it when website owners can easily outsource link building to many service providers!". The article ends with "Let's start at the beginning. Search engines are made by people and that means they all have loopholes. Those loopholes have been broken by many online marketers as they have discovered ways to rank higher in search engines." There are two annotations: a black arrow pointing to the word "outsource" in the first paragraph, and another black arrow pointing to the word "outsource" in the second paragraph. On the right side of the page, there is a sidebar with a "Categories" section listing various topics like Automotive, Business, Education, Finance, Health, etc. There are also two advertisements: one for "MARKET SAMURAI" with the text "GET YOUR FREE TRIAL COPY NOW. I Want One!" and another for "Elektronsko poslovanje" with the text "Jednogodišnje školovanje".

Here are just few sites you can submit your press release to, for free:

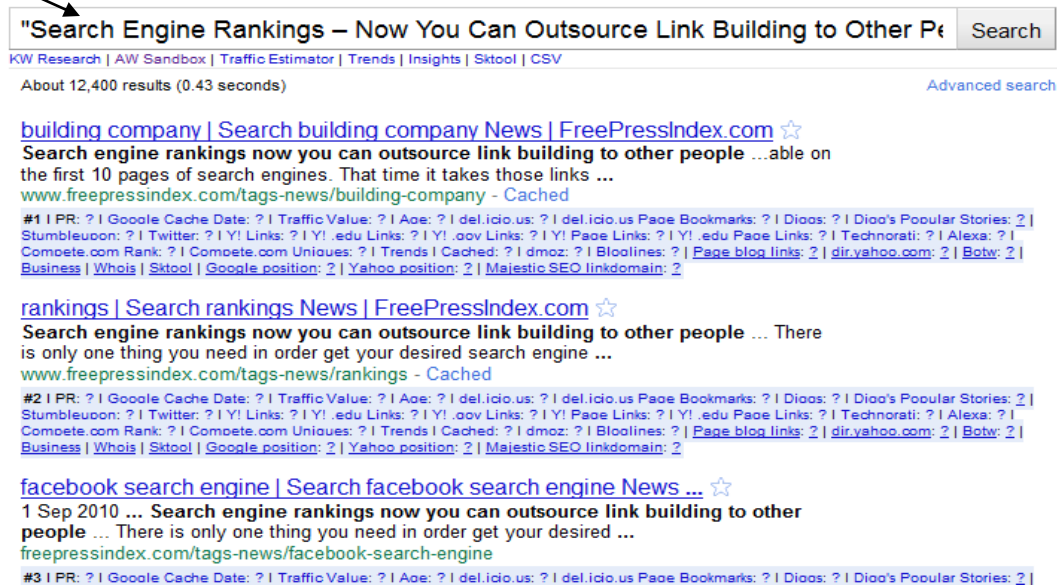

<http://www.prlog.org/submit-free-press-release.html> (PR5)

<http://nwesreleaser.com> (PR4)

<http://www.freepressrelease.com> (PR3)

<http://www.information-online.com/> (PR3)

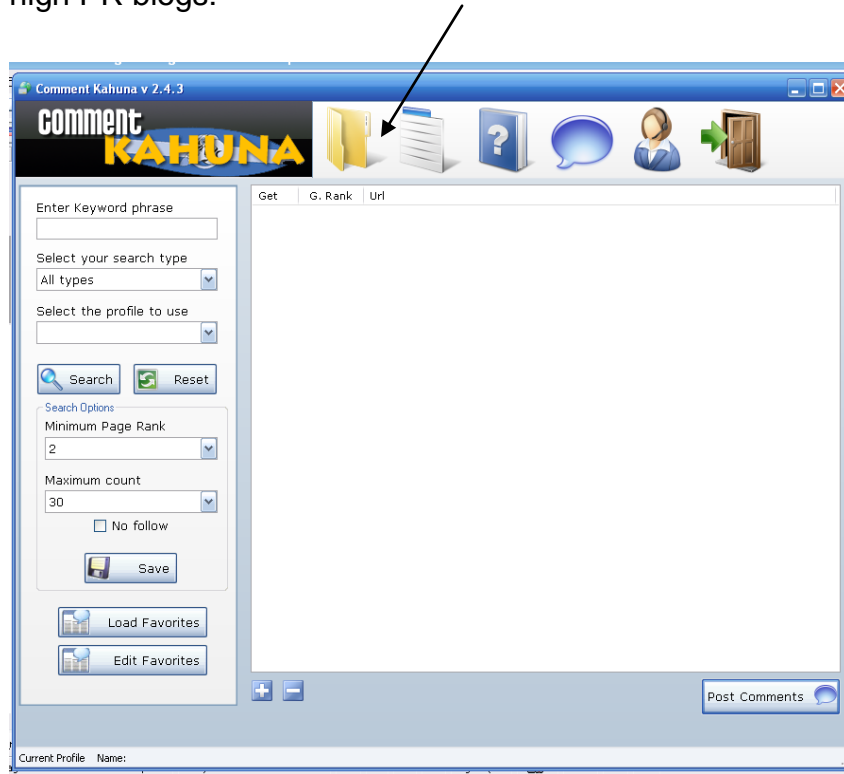

Now, you probably heard me say, we ignored this and we regret that we did. Here is why! That one article that we submitted to 10 different PR directories, for free, we managed to get **12,400** backlinks! And that's WITHOUT doing anything additionally!

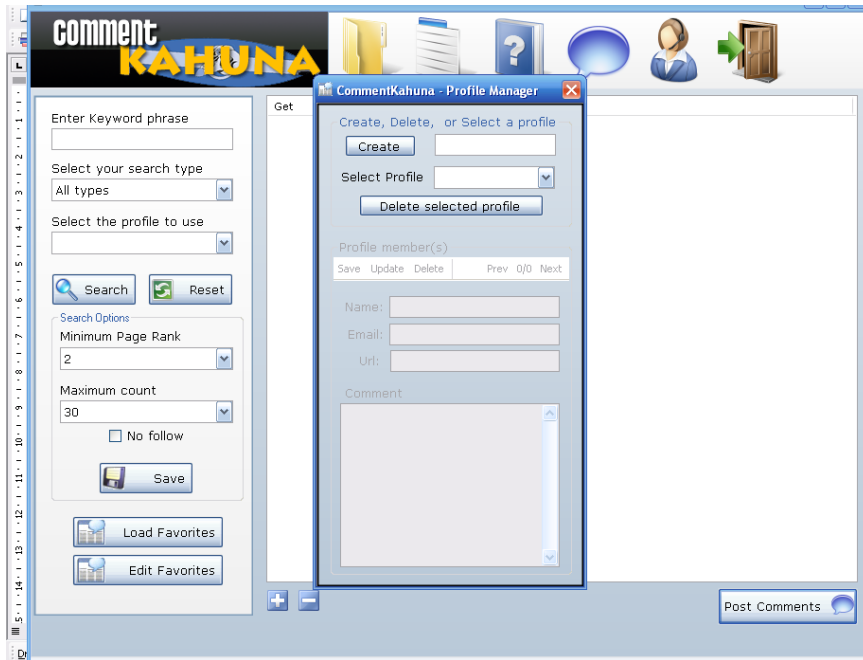

The screenshot shows a search engine results page for the query "Search Engine Rankings – Now You Can Outsource Link Building to Other People". The search results are from FreePressIndex.com. The top result is titled "Search engine rankings now you can outsource link building to other people ...able on the first 10 pages of search engines. That time it takes those links ...". Below the title is the URL "www.freepressindex.com/tags-news/building-company - Cached". The snippet includes various search engine metrics such as PR, Google Cache Date, Traffic Value, Age, del.icio.us Page Bookmarks, Digg, Digg's Popular Stories, StumbleUpon, Twitter, Links, .edu Links, .gov Links, Page Links, .edu Page Links, Technorati, Alexa, Compete.com Rank, Compete.com Uniques, Trends, Cached, dmoz, Bloglines, Page blog links, dir.yahoo.com, Botw, Business, Whois, Sitool, Google position, Yahoo position, and Majestic SEO linkdomain.

#3: How to use [Comment Kahuna](#) to find high PR blogs

First, you need to download the software and activate it. Once that is done, here is how to find high PR blogs:

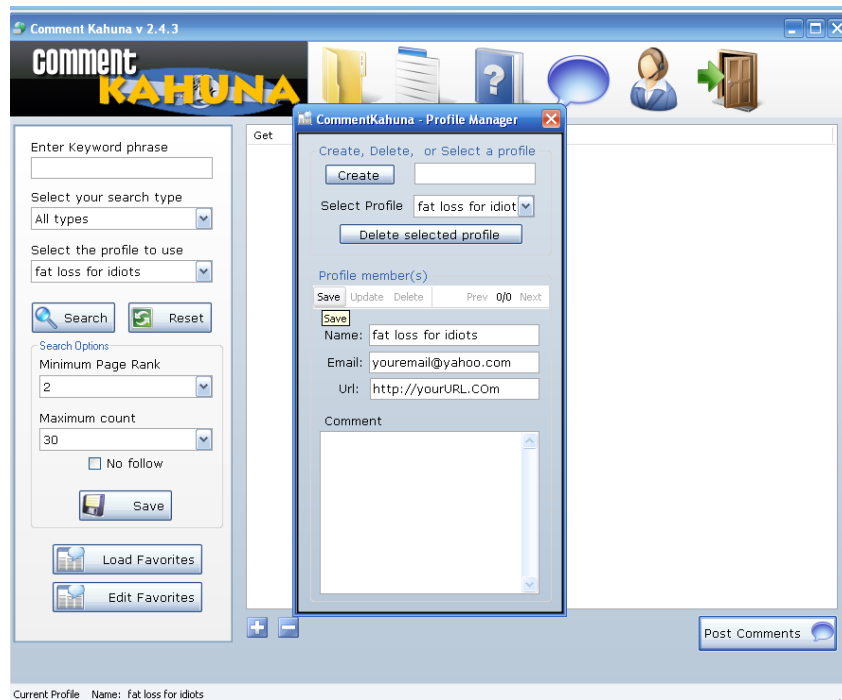

Go to “manage profiles”:

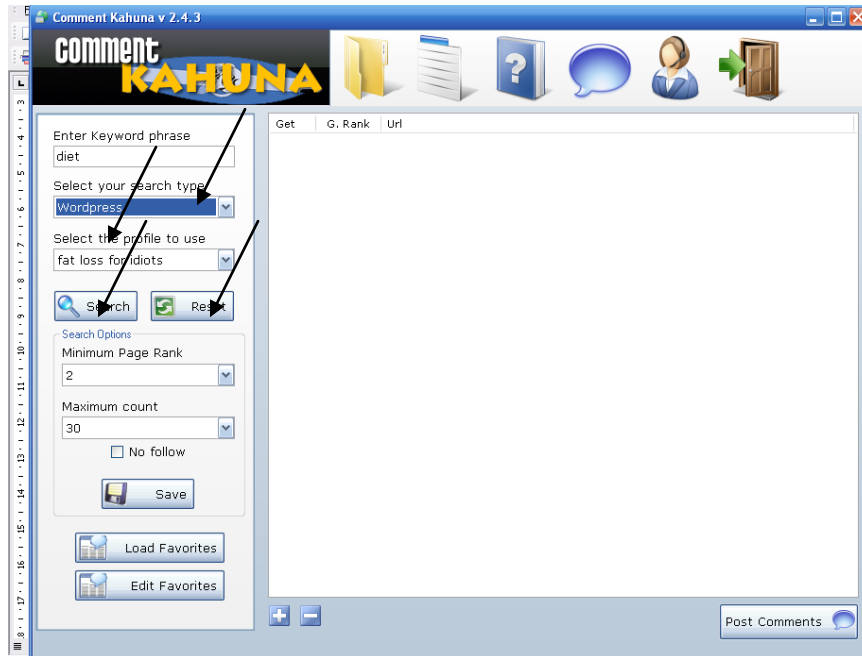

First, create a new profile and name it as your main keywords.

Add your email address, and the URL you are linking

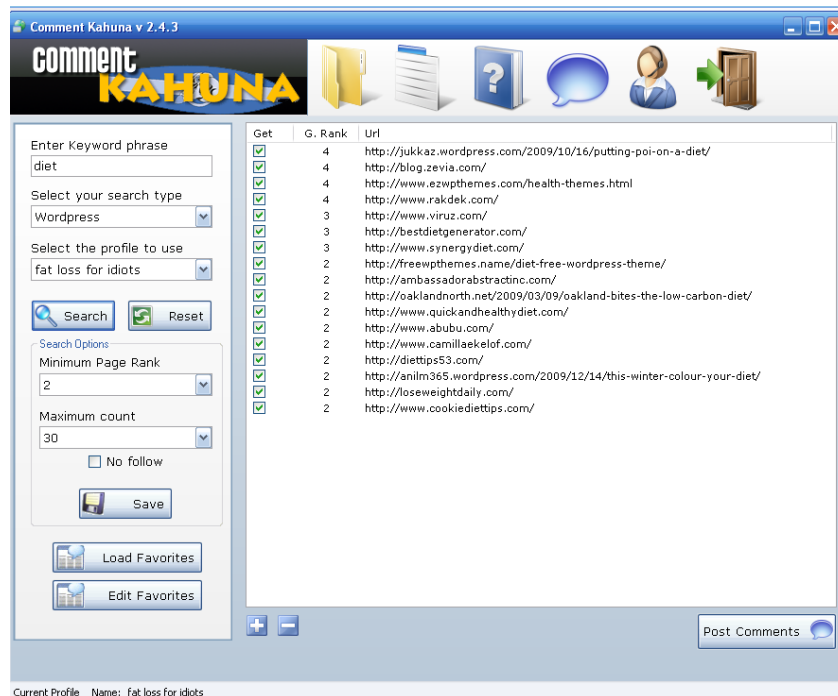

Click “save”, and close that window.

After that, go to the left search tabs

Enter keywords to search, select the source such as WordPress, and select the lowest PR you would like to find sites of, and click on “search”.

You will get a result like this:

And if you are ready to post, you can start posting right in there. Just make sure you posts are not spam, and reference the text that is written on the blog, and there is 80% of chance the comment will be approved.

Oh, and whenever you get to the blog, all you have to do is auto fill the information from profile you created and make the smart comment.

Now a very last thing is to show you how to put all of this into action.

So this all has to begin with two things:

Buyers Keywords

Traffic Generating Keywords

An example of buyer keyword is: xyz product name and often it can come with the review of the product name, or discount on product name and so forth. Such as review of wealthy affiliates, or review of Link dominators and so forth.

People searching for these type of keywords are getting ready to spend money. For example: review of "Atkins Diet plan". People going for a review on a particular diet, are already ready to buy.

PLEASE do not ignore keyword research. That is so important!

There is a great post we added to our blog some time ago, that explains these two types of keywords in detail: <http://linkdominators.com/seostrategies/13-seo-mistakes-part-1-mistakes-on-keywords.html>

While most online marketers and website owners want to rank only for the highest search keywords, there is a gold in low search volume. One month we actually made over \$5000 on a keyword that was "Promo code for *product name".

For you to know what you are competing against, go to Google and type in quotes your keyword to see what is the competition such as “fat loss for idiots diet” which has 1900 monthly searches at this time:

The image shows a Google search interface for the query "fat loss for idiots diet". The search bar shows the query and a "Search" button. Below the search bar, it indicates "About 142,000 results (0.36 seconds)" and an "Advanced search" link. The search results are displayed in a list format, including sponsored links, video thumbnails, and organic search results. The sponsored links include "Fat Loss 4 Idiots \$39.00?", "Fat Loss 4 Idiots Scam?", "Fat Loss 4 Idiots™?", "Weight Loss 4 Idiots", and "Fat Loss Beauty \$9/Box". The organic search results include "Fat Loss For Dummies", "Fat Loss For Idiots Diet", "Fat Loss 4 Idiots", "Fat Loss 4 Idiots / Weight Loss and Diet Center", "Fat Loss 4 Idiots - Complete Review of Fat Loss 4 Idiots", "Fat Loss 4 Idiots Reviews - How to Lose Weight Fast Biggest SCAM?", "Videos for 'fat loss for idiots diet'", "Fat Loss For Idiots Review - Honest and Independent Review", "Fat Loss For Idiots Diet Review - Is Fat Loss 4 Idiots a SCAM?", and "Fat Loss 4 Idiots Diet Review | Should You Buy Fat Loss 4 Idiots?".

The quotes are only to show you how many other webpages are competing for that term. If there are 2 million, skip it and find another one!

One question we get asked a lot is what is a good competition and fast ranking. I would say, anything under 10K, you can rank fast for, anything above, will take some time. But this also really depends on top 10 results. If they are all from authority sites such as Amazon, Ebay, about.com and so forth, your chances of ranking are slim.

The second question is, what is the good search volume? For a buyer keyword, if the competition is low, you should rank for it. It will not take you much time, and you will be up in Google fast and even if it brings you one sale per month, it is worth the effort.

Workload required: On-Page Optimization and Off-Page Optimization

On-Page Optimization

It is really hard to explain each aspect of SEO, but for sure we can give you the basics on how to do your on page keyword optimization.

These are the most important things to do for On-Page optimization, they are mandatory:

- 1) You need to have enough of quality content on each page (at least 500 words of unique content);
- 2) You need to have a keyword density of about 1-3% (1-3 keywords per 100 words). Don` t stuff too many;
- 3) You need to have the „alt“ text for your images containing your keywords (one image – one keyword);
- 4) You need to have your keywords in the first 100 words and the last 100 words.
- 5) You need to LINK to other pages of your site, by using the main keyword of the site, and you can also interlink your pages by using other important keywords you want to rank for, as an anchor text;
- 6) You need to have the main keyword for the page in the page title, description and meta keywords parts of the page (make sure no one of these is missing, because this can have a HUGE negative aspect for the search engines)
- 7) You need to have the keywords in the H1, and the H2 tags of your pages. Let the H1 and H2 be the same size and font as the regular font if you want, but the search engines need to see those, like they are H1 and H2;
- 8) Link from other pages of the site to the homepage, by using your main keywords as an anchor text.

Lets say we wanted to optimize for keywords **affiliate campaign**, and **set up an affiliate campaign**. So we are basically doing 2 keywords per page, which is still good.

The first and the second paragraphs are important because Google will catch these in their results so you want your paragraphs to show these sentences.

So taking our URL:

<http://afftricks.com/blog/1/set-up-an-affiliate-campaign/>

To check the keyword density, you can go to the [Free Keyword Density Tool](#) and plug in the URL. For our URL, we asked to have ONLY 5 results displayed for the top density.

The results showed that we had keyword density for “affiliate campaign” at 1.68 and “set up an affiliate campaign” at 1.51, which is a very good keyword density!\

That is all for on page keyword optimization, now we will move to the off page keyword optimization.

Off-Page Optimization

Now there are many, many arguments over this, but the fact is, when you do on page optimization you are only 30% done, and your off page optimization is 10 times more important!

So what is off page optimization? Basically it's about getting many one way backlinks to your site. These backlinks should not be from any pages. But from HIGH PR pages that are do follow and throw in the mix some no follow links.

It is also important to get those links from High Page Rank Sites, to get better results with your off page optimization. To see which sites have high PR (Page Rank), you can use free software called Rank Checker, and you can download it from <http://www.seobook.com>.

Also, link back should NOT be a raw link, such as <http://urldomain.com>, it should be anchored text link, linking back to your site.

For example, if you are trying to rank for keywords such as "Buy Beagle Dog", your links should look like this: [Buy Beagle Dog](#). When you link with your keywords, it is called Anchored text.

One more thing, your site will have multiple pages. So your "buy beagle dog" is page one, "buy beagle puppy" might be a second one, or "buy beagle food", might be a third one. Each page needs to have on page optimization for those selected keywords, as well as the off page optimization.

Getting sites to link back to your site is not easy, but there are things you can do to actually link back to your own site such as write articles, post comments on blogs *using your keyword, post treads in forums, get onto social bookmarking sites, get article spinners, and you can even outsource this service to others such as [link dominators link building service](#) or [High PR Link Masters](#). It is important to repeat, every time it should be in anchored text.

The problem is for many people that link building takes time and that is why they [outsource link building](#).

#4: Tested and PROVEN plan to achieve high rankings

So your action plan is as follows!

Initial work required:

- ✓ Do your keyword research! Make sure you selecting proper keywords which are buyers keywords.
- ✓ Optimize the page (on page optimization, as explained above)
- ✓ Start off page optimization by submitting your page to directories
- ✓ Get that page social bookmarked (at least 20 social bookmarking sites)
- ✓ Get a few quality articles posted on popular article sites such as ezinearticles.com, goarticles.com and so on.
- ✓ Once they are published, use those same articles and spin them and submit to thefree traffic system

Continuous process (need to work on these below every month, for at least 3-5 months, depending on your keyword competition):

- ✓ Submit smart comments on blogs using your url and keywords (build them yourself or get it done for you at [HighPRLinkMasters.com](#));
- ✓ Get many high PR profile links built! You can do that manually yourself (**warning:** this is VERY time consuming!), or you can get these links built for you at [LinkDominators](#).
- ✓ Submit PR articles to PR directories

And wait for your pages to climb up 😊

We hope you enjoyed reading this book, and we trully hope you will put it in action!

Ivana and Alex
